Stand Alone Treatments

Hydra Lymphatic Therapy \$50 for 20 Minutes

In combination with your HydraFacial® MD treatment, lymphatic drainage works to improve circulation, as well as detoxify, tone, and firm skin. 33% of the lymphatic system is in the face. Gentle lymphatic massage can stimulate the opening of the lymphatic system, increase lymph flow, and assist in the drainage of stagnant cellular fluid and released toxins. Through the elimination of toxins, and promotion of insured nourishment, the skin achieves balance, resulting in a cleaner complexion and improved skin tone and color. Other benefits of lymphatic drainage include a reduction in fine lines and wrinkles due to dehydration, as well as a reduction of puffy skin (edema) and swelling. When the lymph is flowing, the cells are bathed in fresh fluid causing the skin to look fresh and alive.

LED Light Therapy \$30 for 30 minutes

LED Light therapy is non-invasive and it is chemical free. You have the option of either Blue Light or Red Light Therapy

Blue Light therapy has antibacterial properties therefore purifying congested skin, normalizing oil production and prevent future breakouts. It is used to reduce active acne and enlarged pore size

Red Light therapy boosts circulation and stimulates collagen production therefore it replenishes the skin's elasticity and increased skin hydration. It is used to reduce hyperpigmentation, fine lines, and helps with anti-aging.
